The advanced TouchSure hob from AEG comes with a range of reassuring safety features that provide absolute confidence in – and absolute command over – gas cooking. It's a traditional method harnessed with our responsive technology. Instilling confidence to turn up the heat.

The advanced TouchSure hob from AEG comes with a range of reassuring safety features that provide absolute confidence in – and absolute command over – gas cooking. It's a traditional method harnessed with our responsive technology. Instilling confidence to turn up the heat.

**Product Benefits & Features**

**One touch. Absolute control**

The temperature can be regulated quickly and accurately via highly responsive electronic touch controls. No buttons or knobs. Just one sleek and safe surface that enables absolute command over the cooking process.

**Stay informed. Instantly**

The FlameLight LED Indicators clearly display whether the flame is on or off while Residual Heat Indicators identify if the pan supports are still hot after use.

**Safety. Locked in**

The Safety Lock feature ensures that children can't accidentally switch on the hob or change any of its settings during cooking.

**The hands-free hood**

This gas hob is uniquely equipped with Hob2Hood. This feature enables you to switch on your cooker hood and lights as you start cooking on your hob. You can even use the hob to regulate the fan. Keeping your hands focused on your cooking.

**No flame, no gas.**

Gas Stop is the safer way to cook for added peace of mind. Should the hob flame go out, it stops the fuel supply automatically. No checking required. Just a safer kitchen built for creating exquisite food.
