

More space. More taste.

At once

Create several large surfaces to cook on with the Multiple Bridge Function in the AEG induction hob. Two zones can be paired at the touch of a button, providing a single bridge for cooking. By automatically aligning to share both temperature and time settings, it's optimised for using large pots and pans at once.

Create several large surfaces to cook on with the Multiple Bridge Function in the AEG induction hob. Two zones can be paired at the touch of a button, providing a single bridge for cooking. By automatically aligning to share both temperature and time settings, it's optimised for using large pots and pans at once.

Product Benefits & Features

The adaptable surface for every pan

The MaxiSense® induction hob has self-sizing cooking zones. That means each zone detects the sizes and shapes of the pans you're using, however large or small, and sends immediate heat to fit their bases exactly. So you have complete control, and the hob responds just the way you need it to.

Hob2Hood - Cook without distractions

This hob has Hob2Hood, a useful feature that automatically controls your cooker hood and lights. It means you don't get distracted by trying to regulate the fan when you're at crucial cooking moments: you can simply concentrate on getting your dish right. But if you'd rather adjust the fan speed

Zone in with intuitive controls

By turning the hob on and placing a pan down, the ActiveTouch automatically lights up, intuitively showing which zone to use. Once selected, the temperature lights up in red, while the other available options remain white. Backlit LED lights also indicate where cookware is positioned. Providing

Clean as you cook

Because the surface around the pans stays cool as you cook, you can get rid of spills as you go along. Nothing gets burnt on, and there's nowhere for dirt to hide. So it's easy to keep the hob area looking pristine – even while you're still cooking.

Intense rapid heat

No more waiting around for pots to boil. The PowerBoost button gives you an instant burst of heat that boils water in under 90 seconds* – that's even faster than an electric kettle. It's perfect for tasks like boiling potatoes, and other quick cooking jobs too, like searing meat.
