

Rapid temperature recovery. Total food protection

The 5000 ColdSense Fridge Freezer rapidly returns to the correct temperature after door opening and closing, thanks to precise electronic sensors. This helps prevent temperature shocks and food spoilage for total food protection.

Product Benefits & Features

ColdSense protects food by quickly restoring the temperature

ColdSense uses precise temperature sensors to rapidly return the Fridge Freezer to the right temperature after door opening and closing. This helps prevent temperature shocks and food spoilage for total food protection.

LowFrost makes defrosting easier, and needed less frequently

Efficient Fridge Freezer with advanced Low Frost technology which makes the work of defrosting easier and less often needed by using hidden cooling circuits that minimize frost build up.

Internal Electronic Control. For cooling precision

The Internal Electronic Control feature gives you full command of the storage conditions of your food. The LED indicators show you the temperature setting clearly for convenient adjustment and control.

Perfectly fresh food with Frostmatic

The Frostmatic function activates the maximum freezing power, so your fresh produce freezes as quickly as possible. The freezer then returns to its normal setting.

LED lighting illuminates every corner

The internal LED lighting produces a discreet, soft light, shining evenly across the whole space. Plus, LED bulbs are smaller and more energy efficient than standard bulbs – a more sustainable choice.
